General Tank Description:

The unique design of this tank is intuitive and robust, making it the perfect choice for anyone looking for a reliable and efficient oil storage solution with the added benefit of fire protection. Comprised of a steel inner bunded tank ensuring no leaks or spills to the environment, encased in 30-minute fire rated cladding and a steel outer, providing unmatched protection against fire hazards. We will also fit the tank with a secure steel lid, further protecting your gauge and fill point from fire and theft! Store and use your oil with confidence.

Standard Features:

- Made from British sourced high-quality 3mm thick steel
- 30-minute fire rated cladding
- Pyramid roof
- 1" outlet
- 2" top fill point with cap and chain
- Security hatch
- Bund vent
- Lifting eye
- Channels on the base lengthways
- Painted in dark green as standard (other colours available upon request) *Note: The tank will be painted in Farrow and Ball Ltd. Colour no. 211 (Stony Ground)*
- Small tin of touch-up paint supplied with the tank
- 10-Year warranty
- 20-year+ life expectancy when properly installed and maintained
- All tanks are subjected to quality control and pressure testing to guarantee serviceability
- Made in general accordance with BS799 Part 5 and BS5410

Our Fire Rated Tanks have been independently tested (BRE Global – Effect of Radiated Heat on Firecheck Fuel Tank: Report 284048) and surpassed all expectations, providing peace of mind that you can trust our product to keep your oil safe and secure. The tanks also complies with The Control of Pollution (Oil Storage) (England) Regulations 2001, The Water Environment (Oil Storage) (Scotland) Regulations 2006, British Standard BS5410, The Pollution Prevention Guideline PPG2, and Fire Safety Regulations.
