Submission: Objection

Comments: Having studied details of the planning application. we object due to concerns on mainly on three areas.

The first is the location of the LOADING DOORS on the Gable Elevation GL1 which will cause a disturbance to us due to the noise of fork lift trucks etc. coming and going 24 hours. We have complained over the years about the use of fork lifts during the night shifts as they are noisy over the rough road surface, have warning beepers and flashing lights. We feel they could either do away with it completely. or move the entrance to the lower part of the elevation Noise emanating from the works is funnelled up the entrance road towards our cottage and feel this will greatly increase on this side of the building.

Secondly the construction of the Front Elevation GLA being metal sheeting will not contain any noise from within the building and should be built completely of cavity brickwork with high efficiency soundproofing to prevent noise pollution and disturbance.

Thirdly we feel the translucent panels on the roof cladding facing our cottages will cause light pollution towards us. We already have a major issue with light pollution from the lighting on the office building at the entrance to the works.
