Categories:

Hi James,

We have been consulted on the above application again. We previously had no comments to make on the variation of Condition 1.

This consultation request also includes a variation of Condition 9, which seeks the approval of the Floodlighting Report prepared by Mullins Associates Group. The purpose of Condition 9 is to ensure the approved lighting is working as intended. It doesn't have a specific ecology element. Other than to note that the lighting is in good condition and fully functional in line with its intended purpose, we have no comments to make on the submitted report.

Best regards,
Libby.
