

Your notice date is 1 October 2015 Your current plan ends on 31 October 2015

If we don't hear from you by your notice date, you won't move on to a new fixed price plan. Instead, we'll move you on to the variable electricity price plan shown inside, which has no end date. These prices are generally higher than our fixed plan prices and we may change them at any time. To find our latest variable prices please log in to your account at eonenergy.com or give us a call.

If you want to switch supplier at the end of your plan, you'll need to terminate your contract on or before your notice date. To terminate your contract, you can:

- write to us at:
Contract Terminations, PO Box 9002, Sherwood Park, Amesley, Nottingham, NG15 5AZ
- email us at suncontractterminations@eonenergy.com
- call us on 0345 301 5343

If you terminate your contract and we continue to supply you after your current plan ends, you'll be charged our out of contract prices which are shown below. These prices are higher than our fixed and variable price plans and we may change them at any time. To find our latest out of contract prices, please log in to your account at eonenergy.com or give us a call.

Name: Variable Out of Contract Electricity Prices - Base-rate	
Standing Charge: 35p per day	Normal Units: 19.05p per kWh

Please make sure you clear any outstanding balance on your account and that your new supplier has requested all of your related meter points on the same working day before you try to leave us, otherwise we may object to you switching supplier.

Your contract with us is continuous, which means it will only end when you switch supplier. If we choose to end it or if you agree a new contract with us. When you agree a new contract with us your existing contract will end when your new contract starts.

Our terms and conditions have changed.
To find out about these changes and how they apply to you, or if you'd like a copy of our terms and conditions, please go to eonenergy.com/smetermischanged or give us a call.

¹ We may have used estimated readings or less than 12 months worth of meter readings to work out your annual consumption. Please visit eonenergy.com/annualconsumption for more information about how we calculate your usage. If you think this figure is wrong, please call us.

² We've worked this out by multiplying your consumption (on each rate) by the price per kWh. This includes 5 years' standing charge and a 2% prompt payment discount for paying within 14 days of your bill date. This doesn't include VAT, CCL, CCL Equivalent Charge and Green Deal.

³ Providing you don't make any changes to the information you have provided us, or your contract and you keep to its terms, this excludes VAT, Green Deal, CCL or CCL Equivalent Charge which will be applied at the applicable rate.
