[REDACTED]

Good Evening,

I have had a letter posted the other day that there has been planning permission put in for knocking down the old building and putting up another new premises a new factory and offices for Minibus Options Ltd , I have tried to access the planning online but I can't seem to find the information all about the building.

I am writing to say that myself and my partner who live in 6 Bingswood Road are against this and are not happy about a new construction with all the concerns I have with how the amount of traffic flow will affect the road also with vehicles potentially parking on the road as there is small amount of parking that we already have when the building is being build and also when it is completed with their customers and staff parking , with also the traffic flow of wagons or construction vehicles that will be going in and out of the entrances.

Another concern is how old the building is does it have as asbestos inside and any removal that might need to happy with the houses being close in the summer would have windows open will be hard . Also, myself and my partner are night shift workers so this will cause a lot of noise and unable to work effectively with construction going on what the working hours will be and how long the building is looking to take to build ? .

Kind regards
Sophie kennerk and Terry Monks
6 Bingswood Road
