Submission: Not Object

Comments: The proposed new changing facility is sited on open ground adjacent to the current clubhouse. It appears that no trees will be directly affected by the proposal. However, access to the site for materials, construction machinery and services may impact upon the root protection areas of retained and protected trees. A pre-commencement condition should be applied which requires an Arboricultural Impact Assessment which takes into account the abovementioned issues and proposes tree protection measures to BS5837-2012 to be erected prior to and maintained for the duration of the build process.

Gareth Hare

Arboricultural Officer
