Submission: Objection

Comments: The impact of 20th century changes on the buildings is acknowledged; the proposal is to face all the building with a proprietary external insulation cladding system. Whilst this may be acceptable on the central section of the buildings, which is faced with reconstituted stone, the cladding of the traditional limestone walls on the two wings would have an unacceptable impact on the remaining character of the buildings, which should be repaired and restored, rather than clad. The applicants should consider internal insulation systems on these more traditional sections of the building.
