Submission: Objection

Comments: The extension of the quarry would cause significant damage to the surrounding landscape, flora and fauna, as well as access to the countryside for local residents and tourists. The land surrounding the quarry is already fragile due to previous mining operations. Once the existing license expires in 2042, the area should be restored and be returned to a more natural state. The impact of the quarry continuing to operate would necessitate huge fines for CO2 production which the plant cannot afford. We as local residents should not have to suffer the disruption and huge negative impact of the Peak Cluster project because the cement works cannot fund an alternative solution.
