

Club Statement:-

The new container will be for the storage of a new tractor-mower which the club has recently secured a grant for. There is no space within the current storage container (adjacent to the clubhouse), which is now predominantly used for the equipment needed for the 600 club members. The club have also brought pitch 3 (lower grass pitch), into use which requires the storage of further nets, respect barriers and corner flags etc. within the original container. The new tractor-mower will allow the club to maintain the grass pitches in-house, without the need for 3rd party involvement, which will assist with the reduction of overall running costs for the community club over the coming years. All grass maintenance equipment will be stored within the newly proposed storage container.

The proposed container is to be located within the least visually intrusive area of the club grounds, on the corner of the existing car parking area (without the loss of any car parking spaces).
