Submission: Neither

Comments: We consider ourselves to be immediate residents to this green space and find it strange that we have neither received a letter nor seen any notification in the area about this.

Whilst any upgrade and continuing maintenance of our local green spaces is welcome, the sudden rush to submit this planning application makes us wonder what the motive is - it seems strange that just one area of a total recreation space has been selected, without further comment to the remainder - though we are pleased to note that the rest of the land at Fauvel road is continuing to be address as 'recreational space' as is recognised that it is in continual use by the local residents - this is a really valued green space for many in the area to walk their dog, safely teach their children to ride a bike, kids play football safely. I know the rugby club also uses when their ground is water logged too - not to mention the Cadets - and other public uses of their building e.g. polling station etc.

What this land also does is retain some heritage and beauty in this historic part of Glossop and give a really attractive, green welcome to those entering Glossop from the North via Woodhead - it is hoped that this upgrade suggested is part of a long term plan to retain the whole of this Fauvel Road/Norfolk Street/Lord Street triangle of land - I call it our 'Notting Hill garden' as reminds me of those green spaces in London that the locals enjoy and are essential for wellbeing of local residents and the aesthetic of a town worthy to remain in the Peak District National Park.

It is even more vital that this green space is protected, upgraded and maintained, should the neighbouring Talbot Road housing development be approved at a future date - whilst this is currently rejected on the basis of lack of information and Sports England objection to the loss of playfields, it is essential that no further recreational spaces in this area are put at risk of loss and hopefully the Talbot Road development will shrink it's proportion of houses to accommodate all/some of the playing fields it has lost - if only to create greater buffers around the perimeter and ensure that it is an attractive landscaped development with plenty of open spaces for nature to continue. Fauvel Road Recreational site is essential should any proportion of development be successful on Talbot Road.
