## Solus - Sizes

Sizes to suit every application

Executive, compact office accommodation for quality and comfort. Portakabin Solus buildings are available in eight sizes. The largest option will accommodate up to seven people in a single building. Layouts can be tailored to meet your exact needs: partition walls can be used to create individual offices, kitchen and toilet facilities.

Flexibility for larger designs

Should you require additional space, Portakabin Solus buildings can be linked side to side or end to end to form larger complexes. Our experienced staff will ensure that all your requirements are taken care of.
