

Oakhill Primary School, Tamworth. This attractive shelter is designed to securely accommodate buggies and prams. Its welded construction is tough and strong and has a number of anti-vandal features to meet today's demanding environment.

We suggest you need to allow just under 1 square metre per buggy, therefore a shelter measuring 1 metre x 2 metre will accommodate 2 to 3 buggies comfortably at any one time. A 4 metre x 2 metre shelter will accommodate 8 to 10 buggies.

Features:

- ClearView PET roof sheeting giving excellent all round visibility
- True modular design, extensions added without drilling or welding
- Security bar at the rear of the shelter
- Base plate fixing
- Full height entry
- Available in 2 metre and 4 metre lengths

Optional Extras:

- Modular extension to any length
- Extended roof for extra weather protection
- Submerged fixing
- Lighting
- Rear security bar for users own lock
- Polyester powder coated to a standard colour
- Installation service available (please speak to a Sales Advisor)

Capacity:

- A 2 metre shelter can house upto 4 buggies, and a 4 metre shelter can house upto 8 buggies. These figures can be doubled if tandem parked.

Other uses:

- Meet 'n' greet, people or passenger waiting areas, bus shelters and smoking shelters
